

VMWARE CLOUD ON AWS

Reveal the value the VMC can have in your cloud migration and understand the need in place to capitalise on this solution

VMC ON AWS BUSINESS CASE & READINESS ASSESSMENT

Cloud Migrations are full of risks. Often legacy systems will be too costly and time consuming to transform to run in AWS in the timeframes demanded by programs working to an aggressive schedule. VMC on AWS offers a bridge to the cloud for the hardest apps running on on-premises VMware environments. Once moved into VMC, the apps can now have an integration and transformation path to AWS native services where the business can retire technical debt methodically without risking program schedules.

Cevo's assessment helps our customers calculate the hard and soft benefits of VMC, and work on identifying the key readiness activities the organization needs to use VMC.

WHY CUSTOMERS USE THE VMC ON AWS BUSINESS CASE & READINESS ASSESSMENT

This four-week Amazon Workspaces pilot is relevant to you if:

You are currently migrating or planning to migrate your datacentre apps to AWS

You want to understanding the costs and benefits of the VMC approach

You have internal operations team with VMware operational tooling experience, and limited public cloud knowledge

You want to understand and start planning for VMC in AWS

You want to understand your options to de-risk and accelerate the migration

You have a compelling event for a data centre exit or key hardware end of life

The deliverables from the two-week engagement are structured with the relevant content to help complete the business case for VMC and to start implementing the foundations for readiness

ANALYSE

The engagement begins with a quick tools-based assessment of the migration candidate apps to gather key information.

Additionally the Cevo consultant will review current infrastructure in regards to supporting VMC.

CONSULT

Workshops to review initial findings and pain points with the migration candidate apps.

Workshops with operational, network and security teams.

Workshop cost modelling with customer stakeholders.

REPORT

Cevo will produce the report to support an internal business case for VMC with cost modelling.

Key readiness activities are identified allowing the program to plan ahead with people and budget.
